

EMF New Functionality – December 1st, 2009

Added Name Contains feature to the Case Manager

EMF now has a Name Contains Feature to help quickly find cases in the Case Manager.

To use this feature click inside the *Name Contains*: box and enter a search text.

The text in this search feature is case insensitive and a wild card (*) can be applied.

The returned table items will be refreshed by:

1. Reselecting a new Category in the *Category* combo box
2. Hitting the Enter key inside the *Name Contains* box
3. Clicking the *Refresh* button in the upper right corner of the Case Manager

Added Name Contains selection feature when copying Jobs, Inputs or Parameters

Copying Jobs, Inputs and Parameters in the Case Manager editor, is now easier with the addition of the *Name Contains* filter box.

To use this feature from the Case Editor, select a Job, Input or Parameter and click *Copy*. In the copy dialog, there is a *Name Contains*: selection box. Simply type relevant information into the box to further filter the data.

The screenshot displays the Emissions Modeling Framework (EMF) Case Manager interface. The main window is titled 'Case Editor: 2002ae_02b_CAP-Cl'. The 'Jobs' tab is selected, showing a list of jobs. A red box highlights the 'Jobs' tab. The 'Copy 1 case job(s) to case:' dialog box is open, showing a list of jobs to be copied. The 'Name contains:' field is set to '2002ac_tox'. The list of jobs includes:

#	Select	Name
